

NAFEEH KP

ABOUT ME

Passionate MERN stack developer with strong expertise in building full-stack applications using MongoDB, Express.js, React, and Node.js. Skilled in developing scalable, high-performance web applications, with a focus on clean code, modern UI/UX principles, and responsive design. Known for problem-solving abilities, attention to detail, and a commitment to delivering efficient, user-centric solutions.

EXPERIENCE

Oxdu Tech School2024– 2025

- .Designed and implemented responsive layouts using CSS Grid and Flexbox, resulting in a 30% improvement in mobile user engagement.
- Developed clean, semantic HTML for accessibility and SEO optimization, enhancing website visibility and user accessibility.
- Transformed static mockups into interactive web pages, adhering to brand guidelines and modern design trends.
- Refactored outdated float-based layouts to utilize Flexbox and Grid, improving maintainability and reducing code complexity by 20%.
- Collaborated with designers and back-end developers to align user interface elements with user experience goals.
-

PROJECT

Netflix Clone

Developed a responsive Netflix clone using HTML and CSS, replicating the core layout and design of the popular streaming platform. This project includes a visually appealing landing page, multiple sections for trending, popular, and recommended movies, and a custom navigation bar. Employed CSS Grid and Flexbox for layout, achieving a clean, adaptive design that works seamlessly across devices. Paid close attention to UI/UX, focusing on consistency, spacing, and typography to deliver a polished user experience similar to Netflix's interface. This project showcases my ability to recreate complex, real-world web layouts and enhance my HTML and CSS skills.

[NET-FLIX CLONE](#)

Facebook Clone

Created a Facebook clone using HTML and CSS, replicating key elements of the popular social media platform's layout and design. The project includes a functional landing page, user profile sections, a news feed, and sidebars. Employed CSS Flexbox and Grid to structure the page, ensuring responsiveness and adaptability across devices. Focused on recreating Facebook's clean, user-friendly interface with attention to detail in typography, spacing, and alignment. This project demonstrates my proficiency in building complex layouts and replicating real-world UI designs using HTML and CSS alone.
